Contents

Vol.13 No.1 March 1997

1 Editorial: Research on the 'Virtual Society?'

2 Constructing collaborative learning activities for distance CAL systems:
C-K. Chang & G-D. Chen

16 An analysis of pupils' reflective writing within a hypermedia framework:
G. Deadman

26 A hypermedia system to aid teacher understanding of pupil preconceptions:
N. Wiles & D. Wright

35 Students modelling environmental issues:
A.C. Kurtz dos Santos with M.R. Thielo & A.A. Kleer

48 A model for understanding learning from management simulations:
D. Tonks & S. Armitage

59 An interactive system for learning rotational dynamics: *A.S. Dhillon*

68 **Research Note**:
The Talk, Reasoning and Computers Project (TRAC):
R. Wegerif, N. Mercer, K. Littleton & L. Dawes

Vol.13 No.2 June 1997

73 Editorial: University-supported learning

74 Cognitive loads and the empowering effect of music composition software:
R.J. Phillips & A.J. Pierson

85 Communication media for distributed communities: *E. Heeren & R. Lewis*

99 Automatic assessment of elementary Standard ML programs using Ceilidh:
S.P. Foubister, G.J. Michaelson & N. Tomes

109 Entitlement through IT in mathematics classrooms: *H. Povey*

119 Applying CD-ROM interactive storybooks to learning to read:
N. Adam & M. Wild

133 Evaluation of a hypermedia document as a learning tool:
T. Cockerton & R. Shimell

© 1997 Blackwell Science Ltd

Vol.13 No.3 September 1997

145 Guest Editorial: Learning through collaboration: *F.W. Hesse & A. Tiberghien*

148 Manipulable graphics for computer-supported problem solving:
P. Reinhard, F.W. Hesse, A. Hron & E. Picard

163 Relating characteristics of teaching situations to learner activities:
A. Tiberghien & E. de Vries

175 Promoting reflective interactions in a CSCL environment: *M. Baker & K. Lund*

194 Modelling students collaborating while learning about energy:
P. Brna & M. Burton

Vol.13 No.4 December 1997

207 Guest Editorial: Computer mediated communication: *A. Tolmie & S. Barbieri*

210 An Activity Theory framework to explore distributed communities: *R. Lewis*

219 Computer-mediated communication as a learning resource:
E. McAteer, A. Tolmie, C. Duffy & J. Corbett

228 Computer-mediated tutorial support for conventional university courses:
P. Light, C. Colbourn & V. Light

236 Making hypertext lecture notes more interactive: undergraduate reactions:
C.K. Crook

245 Evaluating a virtual summer school: *K. Issroff & M. Eisenstadt*

253 Monitoring a CMC environment created for distance learning:
T. Wilson & D. Whitelock

261 Telematics and on-line teacher training: the Polaris Project: *G. Trentin*

271 Inter-university cooperative learning: an exploratory study:
A. Calvani, P. Sorzio & B.M. Varisco

281 Gender, Identity and CMC: *S.J. Yates*
